BALLOT QUESTION

To reduce the risk of wildfire/improve wildfire prevention, including removing dry brush, dead trees, fuels and fire hazards; improving emergency evacuation systems, routes and procedures; supporting defensible space around homes, neighborhoods and critical infrastructure providing more green waste disposal options; shall the Truckee Fire Protection District measure levying \$179 per parcel for eight years be adopted, providing \$3,700,000 annually in locally-controlled funding for wildfire protection, with independent audits, exemptions for low-income residents, and citizen oversight?

A. Findings

The Truckee Fire Protection District (“District”) Board of Directors (“Board”) is authorized and charged to provide fire protection and prevention services, including reducing the risk of wildfire and improving local wildfire prevention.

The Truckee and Donner Summit areas’ scenic forests and lush vegetation make it a desirable place to live, work and visit, it also makes our residents, businesses and natural environment vulnerable to wildfire.

Truckee and Donner Summit area forests are now experiencing a 100-year buildup of dry brush and dead trees, and removing these materials in an environmentally responsible way would help reduce the risk of wildfire and improve the health of our forests and watersheds by restoring a more natural balance.

As wildfires continue to get larger, faster, and more destructive, additional resources are needed to clear dry brush, remove fire hazards and better protect against wildfire emergencies.

In 2016, the District collaborated with the community to develop the first Truckee area Community Wildfire Protection Plan (“CWPP”).

The CWPP is a comprehensive, scientifically based assessment of the wildfire hazards and risks within District, which has been identified as a Very High Fire Severity Zone by Cal Fire.

The CWPP identifies the risks facing our community and helps the District develop short-term and long-term strategies to reduce the risk of wildfire and improve emergency preparedness.

The District has already been able to complete some of the priority projects identified in the CWPP; however, the full scope of needs cannot be addressed without an additional funding source.

The Board has determined that it is in the best interest of the community to seek voter approval, which will require approval by two-thirds voters voting thereon, for the Wildfire Protection Measure, a proposed special tax that would provide a stable, dedicated source of local funding to be used for the purpose of reducing the risk of wildfire and improving local wildfire prevention within the District.

The Wildfire Protection Measure would provide local funding to remove dry brush, dead trees and other fire hazards, add firebreaks where needed to help prevent or slow the spread of wildfire, and provide homeowners with easy and inexpensive disposal options for trimmings and green waste.

The Wildfire Protection Measure would enable the District to invest more in early fire detection, emergency warning systems and fire-safe evacuation routes to help ensure residents are notified quickly and have safe ways to escape danger if a wildfire does break out.

All money raised by the Wildfire Protection Measure would be spent locally, with preference given to local bidders in accordance with District policy as appropriate, to provide fire protection and prevention services and could not be taken by the State.

An independent citizens' oversight committee would review expenditures to ensure funds are spent as set forth in this Measure.

An exemption from the Wildfire Protection Measure will be available for low-income residents of single-family homes to ensure that this Measure is not a burden to local homeowners on fixed or limited incomes.

The Wildfire Protection Measure would automatically expire after eight (8) years and cannot be renewed without voter approval.

Pursuant to its rights and authority under State law, the Board may call an election for the purpose of submitting a ballot measure to the voters of the District.

Pursuant to the authority of Sections 13911 and 13913 of the California Health and Safety Code and Sections 53978 and 50075 et seq. of the California Government Code, the District may levy a special tax on all parcels of real property in the District for the purpose of reducing the risk of wildfire and improving local wildfire prevention, subject to the approval by a two-thirds (2/3) vote of the qualified voters of the District voting in an election on the issue.

If approved by the voters, the special tax will be used solely for the purpose of reducing the risk of wildfire and improving local wildfire prevention within the District.

If this special tax is approved by the voters, the District may exceed the appropriations limit as previously established for the District in accordance with the provisions of Article XIII B of the California Constitution.

In the judgment of the Board, it is advisable to call an election and submit to the voters of the District the question of whether the District shall levy a special tax within the District for the purpose reducing the risk of wildfire and improving local wildfire prevention within the District.

Pursuant to the Elections Code such election may be completely or partially consolidated with any other election held on the same day and in the same territory or territory that is in part the same.

Sections 9160 and 9313 of the Elections Code authorize the filing of an impartial analysis, and Section 9600 et seq. of said code authorizes the filing of written arguments for or against any ballot proposition and rebuttal arguments.

B. Amount and Basis of Special Tax

This Measure shall authorize the District to annually levy a special tax of \$179 per parcel beginning with the FY 2022-23 tax year and continuing for a period of eight (8) years. This special tax is estimated to raise \$3,700,000 in annual local funding for the District. The amount of annual local funding raised by this qualified special tax will vary from year-to-year due to changes in the number of parcels subject to the levy.

C. Use of Special Tax Proceeds

The special tax shall be used solely for the purpose of reducing the risk of wildfire and improving local wildfire prevention, providing a stable, dedicated source of local funding for wildfire prevention and mitigation. Types of projects may include investing more in early fire detection, emergency warning systems and fire-safe evacuation routes that would help ensure residents are notified quickly and have safe ways to escape danger if a wildfire does break out, removing dry brush, dead trees, fuel and other fire hazards, adding firebreaks where needed to help prevent or slow the spread of wildfire, providing homeowners with easy and inexpensive disposal options for trimmings and green waste, updating the Community Wildfire Protection Plan, home hardening, investing in future green waste systems, investing in capital and equipment to help remove fire fuels and reduce the risk of wildfire, improving inspection programs, expenses related to management of these types of programs, and providing for any incidental expenses related to the collection of the tax and managing of exemptions. Where appropriate, preference in contracting to accomplish the above-stated purposes will be given to local bidders in accordance with the District's local bidder preference policy, as it may be amended or revised by the Board.

D. Exemptions

The Measure authorizes an exemption for a property owner who owns and occupies a single-family home as their principal residence and qualifies as low income as defined by the United States Department of Housing and Urban Development ("HUD"). Pursuant to any procedures adopted by the District, upon application an exemption from payment of the special tax may be granted on any parcel owned by a qualified property owner. To qualify for the low-income exception, the applicant must meet the following specific criteria:

1. Own and occupy the single-family residence as their primary residence.
2.
